TYPO3.Flow - Bug # 10185

Status:	Resolved	Priority:	Should have
Author:	Tim Eilers	Category:	- Documentation -
Created:	2010-10-10	Assigned To:	Karsten Dambekalns
Updated:	2010-10-20	Due date:	

PHP Version:	
Has patch:	
Complexity:	
Affected Flow version:	
Subject:	Wrong rule in Coding Guidelines for file naming
Description	

Either this is a special exception or simply wrong:

```
        <listitem>
          <para><filename>FLOW3/Package/Manager.php</filename></para>
          <para>Contains the class
          <classname>\F3\FLOW3\Package\PackageManager</classname>
          which is part of the package
          <package>\F3\FLOW3</package></para>
        </listitem>
```

Shouldn't the filename be "PackageManager.php" or the class name "\F3\FLOW3\Package\Manager"?

Hey Tim,

you are right, the filename **is** PackageManager.php, so it is wrong documentation.

Greets,

Sebastian
