

## TYPO3.Flow - Feature # 10360

<b>Status:</b>	Resolved	<b>Priority:</b>	Should have
<b>Author:</b>	Karsten Dambekalns	<b>Category:</b>	Persistence
<b>Created:</b>	2010-10-21	<b>Assigned To:</b>	Karsten Dambekalns
<b>Updated:</b>	2010-10-25	<b>Due date:</b>	
<b>PHP Version:</b>			
<b>Has patch:</b>			
<b>Complexity:</b>			
<b>Subject:</b>	Make option handling in persistence backends more flexible		
<b>Description</b>			
I would not skip NULL values in all cases, but only if no setter exists. That way you can set existing settings to NULL. For non-existent setters a warning could be logged (at least in dev context), so you have a chance to notice errors.

[+FEATURE] FLOW3 (Persistence): More flexible handling of backend options

Now unknown backend options are ignored if the value is NULL. This way you can still set valid settings to NULL. For non-existent setters a warning is logged (debug level).
