Subject:	f:link.external viewHelper shoul	d prepend http:// when needed		
Description				
The link.external vie	whelper should add http:// if there is	no other protocol present in the	e URI provided.	
Currently, if you add	a link like:			
	www.google.com"> <td>></td> <td></td> <td></td>	>		
It will render as:				
<a href="http://mytyp</td><td>oo3site.com/www.google.com"><td>3></td><td></td><td></td>	3>			
-	ot correct as this is an external link.	For such links, http:// should b	e prepended to th	e URL when using this
viewHelper.
