Fixed bug #10573: t3lib\_TCEforms->helpText() is deprecated and will be removed in TYPO3 4.7 (Thanks Christopher)  
Resolves: #10573

git-svn-id: <https://svn.typo3.org/TYPO3v4/CoreProjects/feedit/trunk@4368> 743128fe-103e-dd11-99c4-001b210b3e58

### History

**#1 - 2010-11-10 01:06 - Chris topher**

Problem is tx\_feeditadvanced\_tceforms->helpText, line 803 and lines 813, 814.

t3lib\_BEfunc::wrapInHelp() provides the functionality for TYPO3 4.5 and newer instead.

- *% Done changed from 0 to 60*

Attached is an untested patch.

The logic could still be less redundant maybe...

Currently the help bubbles are not available in FE context which is why displaying them does not work. Attached v2 takes this into account and also is less redundant.

Any update on this? Would be very nice to have it in next release.

Would sponsoring help?

This issue brakes fe editing in 4.7.0. Since this is the currently promoted version of Typo3, it'd be really great if this could be fixed.

Thanks

- *Target version set to 1.6.0*

I slightly modified the patch to avoid deprecation warnings in 4.7.

Applied in changeset r4368.

I can confirm the patch solves the issue.  
It might be nice to have this patch in the TER version (guessing 4.7 will be in use at quite some installations by now ;-)
