

## Testing - Bug # 10881

<b>Status:</b>	Closed	<b>Priority:</b>	Must have
<b>Author:</b>	Christian Lerrahn	<b>Category:</b>	
<b>Created:</b>	2010-11-17	<b>Assigned To:</b>	Karsten Dambekalns
<b>Updated:</b>	2011-05-06	<b>Due date:</b>	
<b>Subject:</b>	SeleniumTestCase does not run		
<b>Description</b>			
<p>When installing PHPUnit as described in <a href="http://www.phpunit.de/manual/current/en/installation.html">http://www.phpunit.de/manual/current/en/installation.html</a> the SeleniumTestCase will not run even when there is a Selenium RC server running as suggested in <a href="http://www.phpunit.de/manual/current/en/selenium.html">http://www.phpunit.de/manual/current/en/selenium.html</a></p> <p>Execution stops with the error</p> <p>PHP Fatal error: Class 'PHPUnit_Extensions_SeleniumTestCase' not found in /home/umr_test/FLOW3-1.0.0-alpha13-build43/Packages/Framework/Testing/Classes/SeleniumTestCase.php on line 33</p> <p>This relates to <a href="http://forge.typo3.org/issues/10747">http://forge.typo3.org/issues/10747</a> . However, the links provided there do not address this problem.</p>

- Status changed from New to Needs Feedback

Is the Selenium extension installed (should look similar to the following)?

```
karsten@kmac:~ $ pear list -c phpunit
```

```
Installed packages, channel pear.phpunit.de:
```

```
=====
```

```
Package      Version State
DbUnit       1.0.0  stable
File_Iterator 1.2.3  stable
PHPUnit      3.5.3  stable
PHPUnit_MockObject 1.0.1  stable
PHPUnit_Selenium 1.0.0  stable
PHP_CodeCoverage 1.0.0  stable
PHP_Timer    1.0.0  stable
PHP_TokenStream 1.0.0  stable
Text_Template 1.0.0  stable
phpcpd       1.3.2  stable
```

If yes, do you have that file ([pear base]/PHPUnit/Extensions/SeleniumTestCase.php)?

If you had PHPUnit installed before and upgraded, it may be dumb enough to uninstall parts of itself during upgrade. If unsure, first uninstall and then again install PHPUnit.

#### #2 - 2010-11-17 11:59 - Christian Lerrahn

Selenium is installed. My list looks as follows.

```
Installed packages, channel pear.phpunit.de:
```

```
=====
Package      Version State
DbUnit       1.0.0 stable
File_Iterator 1.2.3 stable
PHPUnit      3.5.3 stable
PHPUnit_MockObject 1.0.2 stable
PHPUnit_Selenium 1.0.0 stable
PHP_CodeCoverage 1.0.2 stable
PHP_Timer    1.0.0 stable
PHP_TokenStream 1.0.1 stable
Text_Template 1.0.0 stable
```

I also uninstalled and reinstalled PHPUnit and all its extensions to no avail.

### **#3 - 2010-11-17 12:50 - Karsten Dambekalns**

Running the unit tests works?

### **#4 - 2010-11-17 12:51 - Karsten Dambekalns**

- *Project changed from PHPUnit to Testing*
- *Category deleted (PHPUnit)*

### **#5 - 2010-11-22 06:22 - Christian Lerrahn**

I pulled the latest git version and that seems to have fixed the problem.

The unit tests also run now but I did not try before I updated my repository, so don't know if they would have on the old version.
