

TYPO3.Flow - Bug # 1092

Status:	Resolved	Priority:	Should have
Author:	Daniel Poetzinger	Category:	
Created:	2008-07-20	Assigned To:	Robert Lemke
Updated:	2010-10-20	Due date:	
PHP Version:			
Has patch:			
Complexity:			
Affected Flow version:			
Subject:	MVC - Arguments Validation on Arrays / MVC Validation		
Description			
<p>Currently no filter to validate an Array (e.g. a serialized form with a certain namespace)</p> <p>in the current concept something like register the argument in the controller like this would be good:</p> <pre>\$this->arguments->addNewArgument('searchFilter','RecursiveTextArray');</pre> <p>or I also would like something like</p> <pre>\$this->arguments->addNewArgument('searchFilter','NoValidation');</pre> <p>also</p> <pre>\$this->arguments->addNewArgument('searchFilter',''); throws currently a unfetched fatal error.</pre>

I think that "RecursiveTextArray" is to special to be implemented in the FLOW3 package itself. What about UnrecursiveIntegerArray etc.?
In my opinion you better solve that by chaining existing validators or writing a small validator yourself.

I'll implement the no validation validator though.

#2 - 2008-08-12 09:36 - Robert Lemke

- Status changed from Accepted to Resolved
- % Done changed from 0 to 100

Applied in changeset r1123.
