| <b>Subject:</b>  | Remove AbstractXmlModel and AbstractXmlParser from I18n package |                     |                    |
| <b>Description</b>   |   |                     |                    |
| <p>The AbstractXmlModel is a base class for XML models, but it's not very useful as it is only extended by CldrModel and XliffModel which don't have much in common. So removing the abstract class will simplify the code. The same goes for AbstractXmlParser class.</p> |   |                     |                    |
