TYPO3.Flow - Bug # 11039

Status:	Needs Feedback	**Priority:**	Must have
Author:	Christopher Hlubek	**Category:**	
Created:	2010-11-24	**Assigned To:**	
Updated:	2012-03-14	**Due date:**	
PHP Version:			
Has patch:	No		
Complexity:			
Affected Flow version: FLOW3 1.0.0			
Subject:	Static object container injects properties to result of factory object		

Description

If a factoryObjectName is set for an object, the dependencies of the default implementation are injected to the result of the factory anyway (the factory already returns a complete object). A workaround is to set the className to an implementation that doesn't have dependencies.

If a factoryObjectName is configured, there should be no further injection on the result because the type is unknown beforehand.

History

#1 - 2011-10-21 13:20 - Karsten Dambekalns

- Affected Flow version set to FLOW3 1.0.0

#2 - 2012-03-14 13:41 - Christian Müller

- Status changed from New to Needs Feedback

- Has patch set to No

Christopher, do you think this is still valid, I did not do an in-deep debugging but looking at current master code, I cannot see that this still happens. If not the ticket should be closed.
