Updated:	2010-12-17	Due date:	
PHP Version:			
Has patch:			
Complexity:			
Affected Flow version:			
Subject:	findOneBy*() methods should return NULL if no item was found		
Description			
Currently all findOneBy*() methods of repositories return FALSE, if no records were found. As discussed this should be changed to NULL as done in Extbase (see #10958).

[!!!][~TASK] FLOW3 (Persistence): Make getFirst() return NULL on empty result

The QueryResult::getFirst() method – and consequently also the repository's findOneBy*() method – returned FALSE if the result set was empty. Because this is contrary to the conventions elsewhere in FLOW3, this changes the behavior of getFirst() to return NULL instead.
