Status:	Closed	**Priority:**	Should have
Author:	Tomas Majer	**Category:**	Core
Created:	2010-11-29	**Assigned To:**	Karsten Dambekalns
Updated:	2012-03-07	**Due date:**	
Has patch:	No		
Affected Flow version: FLOW3 1.0.0			
Subject:	Doc comments for render method not work with tabs		
Description			

There are problem with tabs in doc comments in render method. Fluid crash with exception:

#1242292003: could not determine type of argument "text" of the render-method in ViewHelper
"Tx_My_ViewHelpers_MyViewHelper". Either the methods docComment is invalid or some PHP optimizer strips off comments.

Example:
```
    /**
     * @param    string    $text
     * @return    string
     * @api
     */
    public function render($text) {}
```
