The general Aloha styling is done.

There are some issues left which will be taken care of later on cause they are some dependencies:

  - Bug in firefox after activating a headline/paragraph preset - the container elements gets margin-top: -4px

  - Tooltip not completely ready

  - Selfmade presets look buggy due to missing icons and the the fact that the icon styles are only working for a fixed icon size and not for plaintext

icons

  - due to aloha changes some other issues might be there, please just write the down and I'll have a look whether we fix them now or have to wait

Cool!

As we decided in Berlin to have a Design-Workflow,

Douse that mean I should review the results now? :)

Bulk-closing issues because they are

- not relevant anymore due to the sproutcore based backend
- or already implemented in the meantime.
