

TYPO3.Neos - Task # 11612

Status:	Closed	Priority:	Should have
Author:	Rens Admiraal	Category:	
Created:	2010-12-21	Assigned To:	Berit Hlubek
Updated:	2012-08-31	Due date:	
Subject:	Login screen does not scroll on small windows		
Description	<p>When you have a small browser window you have no chance to login because you don't have the loginform visible.</p> <p>This is not only the case when firebug is opened (like in the screenshot), but also when you have a small browser window.</p>

An easy fix would be to add
min-height: 500px;
to
#f3-typo3-login-site
(or calculate that value by using variables for the login box height, padding, margin, etc.)

I'm not quite sure though if it wouldn't be possible to switch to a relative (or even float based) layout so that the login screen makes better use of the space beneath the login box ...

#2 - 2011-03-23 22:46 - Berit Hlubek

- Assigned To set to Berit Hlubek

The plan was to calculate the optimal position. Christopher already had a rough plan for that. I will have a look at this being done somewhere around on the next weekend.

#3 - 2011-05-05 13:49 - Robert Lemke

- Project changed from Core Team to Base Distribution
- Category deleted (User Interface)
- Target version deleted (732)

#4 - 2011-11-07 10:58 - Sebastian Kurfuerst

- Status changed from New to Closed

closing; the login screen needs to be redone anyways according to the new look-and-feel.

#5 - 2012-08-31 10:38 - Robert Lemke

- Project changed from Base Distribution to TYPO3.Neos
