Has patch:			
Subject: Universal tag attributes do not allow other javascript events than onclick			
Description			
<p>It should be possible to add events like onblur, onfocus etc. without the need to write an new TagViewHelper. Or allow something like</p> <pre>eventHandler="{onclick:'doThis()',onfocus:'doThat()}'</pre> <p>which is more generic but has the disadvantage that it's not a valid HTML tag attribute.</p>			

History

#1 - 2011-04-01 10:40 - Georg Ringer

you can still use additionalAttributes to add everything you want...

so IMO no change required

#2 - 2011-05-06 10:37 - Sebastian Kurfuerst

- Status changed from New to Closed
