

TYPO3.Flow - Bug # 12365

Status:	Rejected	Priority:	Must have
Author:	Robert Lemke	Category:	Property
Created:	2011-01-19	Assigned To:	
Updated:	2011-05-06	Due date:	
PHP Version:			
Has patch:			
Complexity:			
Affected Flow version:			
Subject:	mapAndValidate() and map() behave differently		
Description			
mapAndValidate() does not expect \$target to be passed by reference. As a consequence, a string (object name) can be passed, BUT if an array would be passed, the function would actually do nothing (because the result is never returned).			

History

#1 - 2011-01-19 11:37 - Robert Lemke

mapAndValidate() also requires passing a validator but the previous argument is optional ...

#2 - 2011-01-19 11:45 - Robert Lemke

map() also returns the target object directly if \$target was a string! That's contrary to the DocComment

#3 - 2011-05-06 09:27 - Sebastian Kurfuerst

- Status changed from New to Rejected

Not relevant anymore because of new Property Mapper
