Subject:	Add route part handler support		
Description			
<p>Route part handlers are classes which follow a certain interface and can resolve one ore more URL segments as well as build up URL parts from given data.</p> <p>E.g. we'll need a route part handler to resolve titles of TYPO3 pages.</p> <p>The configuration will look something like</p> <pre>\$c->myRoute ->setUrlPattern('[language]/[[page]]/[[pluginOptions]]') ->setDefaults(array('package' => 'TYPO3', 'controller' => 'Page', 'action' => 'default', 'language' => 'en')) ->setRoutePartHandlers(array('language' => 'F3_L10N_Routing_ISOResolver', 'page' => 'F3_TYPO3_Routing_PageResolver', 'pluginOptions' => 'F3_TYPO3_Routing_PluginResolver'));</pre>			

Associated revisions

Revision ff22ce11 - 2008-08-11 21:55 - Bastian Waidelich

- FLOW3: (MVC) Add route part handler support. A route part handler is basically nothing else than a specialized `F3_FLOW3_MVC_Web_Routing_DynamicRoutePart` and can be used to resolve one or multiple URL segments. Resolves #1251.
- Note: There is no implementation of a route part handler yet.
