Updated:	2010-10-20	Due date:	
PHP Version:			
Has patch:			
Complexity:			
Affected Flow version:			
Subject:	Routes with default values for "multiple route part" segments are not resolved correctly		
Description			
<p>With the new possibility to add multiple route parts in one URL pattern segment (see #1250) a new issue emerged: The route "[firstName]-[lastName]/[@action]" is not resolved correctly if defaults are set for lastName and @action and lastName is empty in request URL (e.g. "john-/list"). This happens because static route part handler cuts first url segment from request path when matching the hyphen.</p>			

Associated revisions

Revision 4a3a0742 - 2008-08-11 20:28 - Bastian Waidelich

- FLOW3: (MVC) Added new property "lastRoutePartInSegment" to F3_FLOW3_MVC_Web_Routing_StaticRoutePart to indicate whether a route part is the last in the current url segment. This fixes #1264.

Routing classes are quite messy and complex at the moment. Refactoring and cleanup is needed!
