| Subject: | FIRST_INSTALL not working? | | |
| Description | | | |
| I just made a fresh install of the 4.5.0 Intro Package and I still got the "Install Tool is locked" message. I was under the impression that the existence of the FIRST_INSTALL file made it possible to bypass this lock. Isn't that the case? | | | |

Hi Francois,

I have been able to reproduce this issue. It turns out that when the typo3conf directory is not writable, no ENABLE_INSTALL_TOOL file can be written. Because of this, the error is displayed.

I've created an issue in the core tracker about this (<http://bugs.typo3.org/view.php?id=17544>) and will work on a patch for this.
