Complexity:			
Sprint Focus:			
Subject:	Initial check screen for writable paths		
Description			
<p>I couldn't find any issue about this, so I'm opening one: when installing the Introduction Package with a freshly unzipped archive I stumbled on no less than 3 "not writable" error messages before finally getting to the 1-2-3 screen (and I know from experience that my setup is still not correct, but I'm trying to behave as someone with no knowledge).</p> <p>I know this is related to the Core, but we should really do something about it.</p> <p>Furthermore different messages still have different templates, maybe also because some are errors and others are warnings, which is inconsistent (especially the warning (about "typo3temp", since the process is blocked).</p>

duplicates Core - Feature # 11771: Check for write-permissions before install...		Resolved	2010-12-29

History

#1 - 2011-02-08 13:36 - Francois Suter

- Assigned To deleted (Peter Beernink)

Indeed, I got an additional "not writable" error on step 3, this time complaining about "fileadmin" and "uploads".

#2 - 2011-06-02 23:27 - Steffen Gebert

- Project changed from Introduction Package to Core
- Category deleted (Install process)
- Assigned To set to Steffen Gebert

#3 - 2011-06-02 23:27 - Steffen Gebert

- Status changed from New to Rejected
- TYPO3 Version set to 4.6

duplicate of #11771 (which has a patch)

#4 - 2013-12-12 13:30 - Markus Klein

- Status changed from Rejected to Closed
