Complexity:			
Subject:	Introduce @identifier annotation for objects		
Description			
With the @identifier annotation an object could mark it's internal identifier as usable towards persistence. The persistence layer would then use that when persisting the object and restore that identifier upon reconstitution of an object.

Revision 04984332 - 2008-08-25 13:42 - Karsten Dambekalns

FLOW3, TYPO3CR:

- class schemata now hold information about an object's identifier property (marked with @identifier)
- when storing new objects, an identifier from the object is suggested if available
- when reconstituting objects the node identifier is used for the object's identifier property

This commit fixes #1292.

History

#1 - 2008-08-25 11:09 - Karsten Dambekalns

- Status changed from New to Accepted
- Assigned To set to Karsten Dambekalns
- Start date set to 2008-08-25
- % Done changed from 0 to 30

#2 - 2008-08-25 13:42 - Karsten Dambekalns

- Status changed from Accepted to Resolved
- % Done changed from 30 to 100

Applied in changeset r1155.
