TYPO3.Kickstart - Bug # 12953

Status:	Closed	**Priority:**	Must have
Author:	Regine Rosewich	**Category:**	
Created:	2011-02-10	**Assigned To:**	Karsten Dambekalns
Updated:	2011-07-06	**Due date:**	
Affected Flow version:			
Subject:	Missing '?>' in 2 Files causes ./flow3 kickstart to crash		
Description			

There are two files:

/FLOW3/Packages/Framework/FLOW3/Classes/Resource/Resource.php

/FLOW3/Packages/Framework/Resources/Private/Configuration/Yaml/Loader.php

where the '?>' misses at the end.

This causes either an PHP error saying that a '}' is unnecessary in the specific file or saying that PHP has not enough memory.

History

- Status changed from New to Closed

- Assigned To set to Karsten Dambekalns

Most probably this was caused by the encoding declaration...
