

## TYPO3.Fluid - Task # 13342

Task # 26664 (New): Clean up Form ViewHelpers

Task # 26658 (New): Make Form ViewHelpers consistent

<b>Status:</b>	Resolved	<b>Priority:</b>	Should have
<b>Author:</b>	martin no-lastname-given	<b>Category:</b>	ViewHelpers
<b>Created:</b>	2011-02-24	<b>Assigned To:</b>	Bastian Waidelich
<b>Updated:</b>	2012-06-18	<b>Due date:</b>	
<b>Has patch:</b>	No		
<b>Subject:</b>	f:form.checkbox does only render hidden input for first item of same name		
<b>Description</b>	<p>If you attempt to have multiple forms on the same page with inputs that have the same name-attr (i.e. multiple forms for items of the same type) the viewhelper will only render a hidden input for the first item. This means that only the first form will work as expected whereas all subsequent forms will have limited functionality.</p>

### Associated revisions

#### Revision f25fa5fb - 2012-05-26 21:27 - Bastian Waidelich

[BUGFIX] hidden fields should be rendered in extra section

Currently form.select and form.checkbox ViewHelpers render hidden fields before the actual input field in order to force submission of a value.

This leads to the situation that labels wrapped around the field do not correspond to the actual form field, but to the hidden field.

This is fixed by letting the form ViewHelper taking care of rendering the required hidden fields in the already existing section on top of the form.

- Parent task set to #26658

### #2 - 2011-09-09 15:20 - Robert Lemke

- Target version changed from 1.0 beta 2 to 1.0.0

### #3 - 2011-10-20 01:48 - Karsten Dambekalns

- Target version deleted (1.0.0)

### #4 - 2012-01-18 21:23 - Bastian Waidelich

- Status changed from New to Closed

- Assigned To set to Bastian Waidelich

- Has patch set to No

The current behavior is intended: We only need the hidden field so that the server gets an empty value if you don't tick the checkbox (or radio button). If multiple checkboxes have the same name, we only need the hidden field **before** the first of them. If we would add a hidden field **after** a checkbox with the same name, the checkbox value would have no effect.

- Status changed from Closed to Needs Feedback

Hi Martin ;)

I just checked this one again and I think, I misunderstood you.

Are you saying, that the hidden field is **not** generated in a **second** form, when you use the same name for a checkbox? That would be a bug, indeed.

Each form should reset the counter. Are you using the provided f:form ViewHelper?

I just checked this, and this is really the case. I'll resolve that with #26481 for FLOW3 1.1 and backport this asap.

### #7 - 2012-05-26 21:27 - Gerrit Code Review

- Status changed from Accepted to Under Review

Patch set 1 for branch **master** has been pushed to the review server.
