

TYPO3.Flow - Bug # 1355

Status:	Resolved	Priority:	Must have
Author:	Sebastian Kurfuerst	Category:	MVC
Created:	2008-08-26	Assigned To:	Karsten Dambekalns
Updated:	2010-10-20	Due date:	
PHP Version:			
Has patch:			
Complexity:			
Affected Flow version:			
Subject:	italize should be initialize		
Description			
Hello,			
I just tried to work with the F3_FLOW3_MVC_Controller_ActionController and just stumbled about a really hard-to-spot naming error:			
in Function callActionMethod:			
<pre>if (\$this->italizeView) \$this->italizeView();</pre>			
in the if-clause, it should read \$this->init*i*alizeView			
Of course, the variable name and the variable name comment needs to be changed as well.			
Should I just go ahead and fix this?			
Greetings, Sebastian
