<b>Subject:</b>	AOP is not initialized during __wakeup()		
<b>Description</b>			
<p>Doctrine uses the unserialize trick combined with the prototype pattern, i.e. they store the unserialized object and clone it when needed again. During that clone, upon calling __clone(), the following notice is causing an exception:</p> <p>Notice: Undefined index: __clone in ...Blog.php</p> <p>Backtrace attached as PDF.</p>
