

TYPO3.Flow - Bug # 13634

Status:	Closed	Priority:	Must have
Author:	Regine Rosewich	Category:	Persistence
Created:	2011-03-05	Assigned To:	Karsten Dambekalns
Updated:	2011-03-28	Due date:	
PHP Version:			
Has patch:			
Complexity:			
Affected Flow version:			
Subject:	Wrong SQL statement in \F3\Persistence\Backend\GenericPdo\Backend.php		
Description			
<p>Hi guys,</p> <p>upon testing the blog example, I found a wrong SQL-statement generated in the above mentioned class.</p> <pre>/** * \$sql['tables'][] = "entities" AS "_entity", "properties_data" AS "d"; */ * \$sql['tables'][] = "properties_data" AS "d", "entities" AS "_entity";</pre> <p>The commented line contains the wrong code throwing a SQL-Error.</p> <p>Hope it helps.</p> <p>Regine</p>			

History

#1 - 2011-03-05 00:06 - Regine Rosewich

I forgot to give the line-number of the wrong code.

Its 637 in \F3\Persistence\Backend\GenericPdo\Backend.php

#2 - 2011-03-20 10:50 - Alexander Stehlik

I should have looked in the bug tracker earlier, I spent hours with this issue.

Anyway, thanks a lot for sharing!!

Well, sematically that should be the same, no? What error does this cause, and under which circumstances?

#4 - 2011-03-21 11:59 - Regine Rosewich

In the meantime I use the Doctrine2 persistence, so the error will not happen any more. But as far as I remember it happend, when trying to add a new post to the blog-example without Doctrine2 Persistence.

I dumped the SQL-Statement with a `var_dump()` in Backend.php, cut it out and pasted it into the SQL-editor of PhpMyAdmin. There it threw the same error as in FLOW3.

When changing the syntax as shown in my issue, the error was gone.
