

## TYPO3.Flow - Feature # 1501

<b>Status:</b>	Resolved	<b>Priority:</b>	Should have
<b>Author:</b>	Daniel Poetzinger	<b>Category:</b>	MVC
<b>Created:</b>	2008-09-12	<b>Assigned To:</b>	Robert Lemke
<b>Updated:</b>	2010-10-20	<b>Due date:</b>	
<b>PHP Version:</b>			
<b>Has patch:</b>			
<b>Complexity:</b>			
<b>Subject:</b>	MVC: initializeView		
<b>Description</b>			
Just an idea:			
I would like to split the current initializeView into two methods:			
detectViewForCurrentAction() (returns a view or emptyView)			
initializeView(\$view) (that initialisze a view with controller context)			
That way if required you are also able to set your own view in your action like:			
<pre>myAction() {  //...some logik \$newView=... \$this-&gt;initializeView(\$newView);  ...</pre>			

### Associated revisions

#### Revision 05651b00 - 2009-05-26 22:38 - Robert Lemke

- FLOW3: (MVC) !!! Moved the code from ActionController::initializeView() to resolveView() and introduced a new (empty) initializeView(\$view) method which can be used to initialize arbitrary views or let developers do some cusomt initialization without having to resolve the view themselves. Resolves #1501

### History

#### #1 - 2009-05-16 19:32 - Robert Lemke

- Target version set to 1.0 alpha 1

#### #2 - 2009-05-26 12:05 - Robert Lemke

- Status changed from New to Needs Feedback  
- Priority changed from Could have to -- undefined --  
- Target version changed from 1.0 alpha 1 to 283

What you can do currently is

- setting \$this->viewObjectNamePattern

- or setting `$this->defaultViewObjectName`
- or completely overriding `resolveViewObjectName()`

Would that help in your case?

### **#3 - 2009-05-26 14:21 - Daniel Poetzinger**

What if in my action one view is not enough?

e.g.:

```
if (check some thing)
    $errorView=get some special view
    $this->initializeView($errorView)
    $errorView->setMessage(...)
```

Or if I want to build a composite view in the action?

....

```
$this->initializeView($initialisedSubView)
$this->view->setSpecialSubView($initialisedSubView);
```

### **#4 - 2009-05-26 22:29 - Robert Lemke**

- *Status changed from Needs Feedback to Accepted*
- *Priority changed from -- undefined -- to Should have*
- *Target version changed from 283 to 1.0 alpha 1*

### **#5 - 2009-05-26 23:00 - Robert Lemke**

- *Status changed from Accepted to Resolved*
- *% Done changed from 0 to 100*

Applied in changeset r2404.
