| <b>Subject:</b>   | Mandatory check fails if value="0" |                     |                                   |
| <b>Description</b>  |                                    |                     |                                   |
| <p>Hi Alex,</p> <p>I did a form with some select and radio button fields. All of them are mandatory fields.</p> <p>For example:</p> <p>field:<br/>radio-button<br/>values:<br/>no   0<br/>yes   1</p> <p>Now I opened the form in the FE and chose "yes". All worked fine.<br/>But if I choose "no", which has the value "0", the confirmation page told me that the field must be filled.</p> <p>That happens on select and radio button fields, where I selected the mandatory check.</p> <p>Could you check this please?</p> |                                    |                     |                                   |

### History

#1 - 2008-11-12 14:28 - Stefan Mayer

I made a simple fix in class.tx\_powermail\_mandatory.php row 110:

```
if ((!trim($this->sessionfields['uid'].$row['uid'])) || !isset($this->sessionfields['uid'].$row['uid'])) && $this->sessionfields['uid'].$row['uid'] != 0)
```

#2 - 2008-12-10 11:36 - Titus Nachbauer [Netcreators]

Very closely related, so I won't file a new bugreport:

When using a siple two option radiobutton, the mandatory check seems to fail in any case. The form acts as if no value has been filled in.

**#3 - 2010-10-22 11:42 - Andy Grunwald**

- *Target version set to Powermail 1.5.6*

**#4 - 2010-10-28 22:15 - Andy Grunwald**

- *Status changed from New to Closed*

- *Assigned To changed from Alex Kellner to Andy Grunwald*

This issue was fixed in #5527 (current trunk)
