Has patch:			
Complexity:			
Subject:	Add magic call method to the Empty View		
Description			
<p>The Empty View is meant as a Special Case for situations in which no matching view could be resolved. However, most views come with their own specific methods (such as setters for models etc.) which then result in a fatal error because the Empty View doesn't have these methods.</p> <p>A magic <code>__call()</code> method should solve this issue.</p>
