

Core - Bug # 15689

Status:	Closed	Priority:	Must have
Author:	Franz Holzinger	Category:	Extension Manager
Created:	2006-02-21	Assigned To:	
Updated:	2015-01-02	Due date:	
TYPO3 Version:	4.0		
PHP Version:			
Complexity:			
Is Regression:	No		
Sprint Focus:			
Subject:	EM seems to let me install conflicting extension (reverse dependency checking needed)		
Description			
<p>I have installed tt_products 2.4.6. This one excludes zk_products as conflicts. However it seems that the EM wants to let me install zk_products after tt_products. I did not dare to press UPDATE now in order to do not get the conflict.</p> <p>-----</p> <p>Extension: Shop system (extended by ZK) (zk_products) Go back Installing Shop system (extended by ZK): DATABASE NEEDS TO BE UPDATED Before the extension can be installed the database needs to be updated with new tables or fields. Please select which operations to perform: Changing fields ALTER TABLE tt_products CHANGE inStock inStock int(11) default '0'; Current value: int(11) default '1' ALTER TABLE tt_products CHANGE gradings gradings varchar(40) default ''; Current value: varchar(255) default '' ALTER TABLE tt_products CHANGE subtitle subtitle tinytext; Current value: mediumtext ALTER TABLE sys_products_orders_mm_tt_products DROP KEY tt_products_uid; ALTER TABLE sys_products_orders_mm_tt_products ADD KEY tt_products_uid (tt_products_uid); ALTER TABLE tt_content CHANGE tt_products_code tt_products_code varchar(30) default 'LIST'; Current value: varchar(30) default 'HELP'</p> <p>Clear cache</p> <p>This extension requests the cache to be cleared when it is installed/removed. Clear all cache:</p> <p>(issue imported from #M2652)</p>

Yes, because this is a reverse dependency. tt_products conflicts with tt_products, but you are installing zk_products which isn't defining a conflict with tt_products...

A check should be added that works reversely...

- *Is Regression set to No*

Hi,

as this issue is very old. Does the problem still exists within newer versions of TYPO3 CMS (4.5 or 6.1)?

#3 - 2013-11-19 12:03 - Franz Holzinger

This bug is still present in the latest TYPO3 6.2 Core from this week.

How to test:

Install the extension agency which conflicts sr_feuser_register.

Then copy sr_feuser_register to the typo3conf/ext folder and change the dependency of the file ext_emconf.php of sr_feuser_register: 'typo3' => '4.4.0-6.2.99'. Then install sr_feuser_register. It can be installed despite of the restriction.

There must be an error message and it must be avoided to install the conflicting extension.

#4 - 2013-11-19 12:09 - Alexander Opitz

- *Status changed from Needs Feedback to New*
- *Priority changed from Should have to Must have*

#5 - 2015-01-02 11:23 - Mathias Schreiber

- *Status changed from New to Closed*

The current implementation is a mess that can't be handled.

This issue will be tackled by using composer which offers a clean way of resolving conflicts
