| **Subject:** | RTE removes images under special conditions when saving |

**Description**

I use 3.8 (and 3.8.1) with rtehtmlarea version 1.1.6 and 1.2.0. configuration typical

When saving an article the RTE (or is it typo3 proc anything?) removes an existing image or an inserted image, when there is an   before image.

<p> <img...></p>

I am not sure if html is possible here. There are no other spaces oder linebreaks, so here again without html:
PTAG & nbsp; IMAGE P-END-TAG

I have tested this on 3.8 and 3.8.1 and with rtehtmlarea 1.1.6 an the last version 1.2.0. Is this a general bug or my configuration?

It happens also when there is an image in p-Tags alone and you insert a space right before the image. Then the image are removed when saving...

- Ext config for rtehtmlarea with screenshots
- no other config in TSConfig for the rte
- need other infos?
(issue imported from #M3051)

---

**History**

**#1 - 2006-04-13 17:57 - Stanislas Rolland**

Fixed in TYPO3core CVS, branches HEAD and TYPO3_4-0.
