Subject:	WS icon and selecor shown even if no access

Description

The icon in the "shortcut frame" is always shown whether the user has acces to User>Workspace or not.

The problem seems to be the workspaceSelector() method in file typo3/alt_shortcut.php

How should this method behave?
Suggestion: Disable Workspace manager icon if no access to module workspace is granted. Only show the selectorbox for choosing workspace under these circumstances.

#2 - 2006-07-19 10:36 - Martin Kutschker

Or hide it only, if the user has access to only one WS.
