

flow3.typo3.org - Bug # 162

Status:	Resolved	Priority:	Should have
Author:	Karsten Dambekalns	Category:	HTML / CSS
Created:	2008-02-05	Assigned To:	Karsten Dambekalns
Updated:	2010-10-20	Due date:	
Subject:	Width-calculation in JS doesn't work as expected for 1-side-column pages		
Description			
<p>On pages like the reference or API in the documentation section we use a subtemplate with only one side-column. This works fine in general, but the width calculated by the JS isn't as wide as it could be.</p>			

History

- Status changed from New to Resolved
- Assigned To changed from Christian Jul Jensen to Karsten Dambekalns
- % Done changed from 0 to 100

Turned out to be a CSS flaw in my way of setting up the 1-column subtemplate.
