Core - Bug # 16293

Status:	Closed	**Priority:**	Should have
Author:	Martin Kutschker	**Category:**	DBAL
Created:	2006-06-27	**Assigned To:**	
Updated:	2014-05-22	**Due date:**	

TYPO3 Version:	4.0
PHP Version:	
Complexity:	
Is Regression:	No
Sprint Focus:	
Subject:	installer lists indices under "add fields"

Description
When using DBAL (with Oracle XE) I ended up with ALTER TABLE pages_language_overlay ADD KEY t3ver_oid (t3ver_oid,t3ver_wsid); In the "add fields" section. This is odd. The reason for the above message is that installer/DBAL tries to create the index pages_language_overlay_t3ver_oid which is too long (>30 chars). (issue imported from #M3752)

- Status changed from New to Needs Feedback

- Target version deleted (0)

- PHP Version deleted (4)

- Is Regression set to No

Hi,

as this issue is very old. Does the problem still exists within newer versions of TYPO3 CMS (6.1.7)?
