

Testing - Feature # 1649

Status:	Closed	Priority:	Should have
Author:	Malte Jansen	Category:	
Created:	2008-10-05	Assigned To:	Karsten Dambekalns
Updated:	2010-10-20	Due date:	
Subject:	Allow old Class-Name-Style (with underscore) for testing-filter		
Description			
<p>If you are testing a certain class, you have to enter the class name. But since namespaces you cannot copy&paste the class name anymore. So you have to enter it by your own or you could copy&paste the file name. You just have to replace the "_" through "::"</p>			

History

- Status changed from New to Accepted
- Assigned To set to Karsten Dambekalns

The unqualified class name is not complete, you need it fully qualified anyway. So if you copy and paste from code or test runner output, it will have backslashes (fine). You mean the filename, I suppose...

#2 - 2009-01-05 18:02 - Karsten Dambekalns

- Status changed from Accepted to Closed
