Subject:	Install tool Option [adminOnly] = -1 shuts down Install tool

Description

Seting adminOnly to "-1" kills the install tool. The BE / install tool can only be enabled by editing localconf.php.

This is rather nasty under some circumstances and should be implemented in a way so that only the BE is disabled!

The attached patch should fix this:

1 = admin only

2 = no be users

-1 = no BE, no Install Tool
