Subject:	We need a style for h2		
Description			
<p>On some pages, we have a lot of big h1 headings:</p>			
<p>ManyBigHeadings.png</p>			
<p>It would look better if only the first heading was big and the other were h2. The question is if we should create a style for csc-firstHeader or just use h2 manually in the content elements.</p>
