Subject:	Access Check for Content Elements before drawing the Interface		

Description

as initialized in the dev list there are some points in BE where a user gets access to delete Elements which are not allowed to him. Additionally the Access Check has to be made before to prevent icons with dead end.

As there are a lot of issues belonging to this it's the start of a progress.
Special thanx to Dmitry who realized that in TV and gave the hint how to do.
Thanx to Tapio who workes a lot on BE issues with high energy

Here comes diff01 with following features:
- hide control panel if no access
- hide click menu if no access

Hi,

over the years this parts got many changes in the area of access rights. Something missing or can this issue closed?
