<b>Updated:</b>	2010-05-22	<b>Due date:</b>	
<b>PHP Version:</b>	4.3		
<b>Complexity:</b>			
<b>Sprint Focus:</b>			
<b>Subject:</b>	No icons in clickmenu if you set "Selectorbox in topframe" as navigation mode		
<b>Description</b>			
<p>At BE it is possible to choose where you want to have the menubar e.g. "Left frame menu", "Icons in top frame" or "Selectorbox in top frame"</p> <p>If you set "Selectorbox in topframe" as navigation mode, no icons will be displayed in the clickmenu/contextmenu in the left "Treeview"-Frame. It is because this option was made for small screens and taking off icons it takes less vertical space.</p> <p>Maybe its better to have a checkbox to activate the icons or insert a 2nd option called "Selectorbox in top frame (with icons)" (issue imported from #M7278)</p>

### History

#1 - 2010-05-22 22:51 - Chris topher

This was fixed with moving to the new BE for TYPO3 4.2 (which removed the option). The old BE is broken at several places since a long time...
