Subject:	Always generate Icons, assume that we have gd2 by default				
Description					
as we require PHP5 for TYPO3 4.2 and PHP5 comes with gd and gif write support enabled it is now save to permanently enable icon generation. We can also safely assume that we have gd2.					
This was originally part of another issue with icon generation that has been fixed meanwhile. However, this part was forgotten. (issue imported from #M7837)
