<b>Created:</b>	2008-04-20	<b>Assigned To:</b>	Chris topher		
<b>Updated:</b>	2010-05-28	<b>Due date:</b>			
<b>TYPO3 Version:</b>	4.2				
<b>PHP Version:</b>	5.2				
<b>Complexity:</b>					
<b>Is Regression:</b>					
<b>Sprint Focus:</b>					
<b>Subject:</b>	re-login to backend_old results in new backend				
<b>Description</b>					
In my localconf.php I have interfaces=backend_old. When I login the first time, everything works fine. When I open a new tab with the backend, the new design appears.  IE7 and FF2 tested (issue imported from #M8167)

### History

#### #1 - 2008-04-20 17:50 - Steffen Kamper

can't confirm this by testing

#### #2 - 2008-04-28 18:09 - Lars Mathwig

when i change typo3/index.php line 145 redirectToURL to alt\_main.php this will do the trick for me.

#### #3 - 2008-05-28 13:22 - Dani Eka

Had same problem. Fix does work.

#### #4 - 2008-07-01 20:59 - Pascal no-lastname-given

I am experiencing the same problem after an upgrade from 4.0.9 to 4.1.7 en from there (after running the update wizard) to 4.2.1.

interfaces = 'backend' results in the old interface and 'backend\_old' in the new, 4.2 interface  
These values do appear in the loginform in the hidden 'interface' field

workaround would be: use interfaces = backend\_old if you want the new one and vice versa

#### #5 - 2008-07-13 14:28 - Martin Kutschker

I can confirm this. Only the login will bring you to alt\_main.php any other invocation of a URL with typo3/ will always redirect to backend.php.

Seems that the BE interface has to be stored in the session for later use.

**#6 - 2010-05-28 19:30 - Chris topher**

After the old BE was removed in #22701:

Resolved no change required.
