Subject:	"ADMCMD command could not be executed!" after preview link expired				
Description					
<p>I generate a preview link from a workspace and visited that link. After the link expired and the content was published, I got the following error on trying to access the live site:</p> <p>"ADMCMD command could not be executed!"</p> <p>Removing the cookies for the site solved the problem.</p> <p>(issue imported from #M8352)</p>					

History

- Target version deleted (0)

What's the actual issue? That the link was expired or that you saw a page even after the link expired?

The problem is that I get an error message when visiting a page of the LIVE site that had been edited in a workspace before. The expected behaviour would be that the system displays the live version.

#3 - 2011-08-14 17:07 - Martin Holtz

i just had the same issue in a test installation (4.5.3).

A few days ago i tried different settings with the workspaces. Today i logged in, just tried to show the page and got that error.

Sorry, i did not checked the cookie, just deleted it. Now everything works fine.

#4 - 2012-01-27 20:30 - Tolleiv Nietsch

Sorry I'm not able to reproduce this - is this still valid?

#5 - 2012-04-09 11:30 - Jan Boysen

Hi..

I just was able to reproduce it (at least some kind as the error is different, but seems related to it).

(Typo3 version 4.6.7)

Here are the steps:

- Created a new Workspace
- Modified some things in the workspace
- Generated a preview link for that workspace
- After the Link has expired the entire frontend just shows "Oops, an error occurred!"
- Removing the cookie named ADMCMD_prev everything is ok again.

The cookie:

Name: ADMCMD_prev

Content: 5868c49194cb392b306678d1a51a6b6f

Domain: *****

Path: /

Send For: Any kind of connection

Accessible to Script: Yes

Created: Sunday, April 8, 2012 5:06:59 PM

Expires: When I close my browser

So the bugfix in my eyes would be so set a specific expiredate for the cookie and not "When I close my browser" as I did not close my entire Browser, which in real happens maybe once a week or even more seldom.

#6 - 2013-01-18 00:06 - Lars Houmark

Still a problem with 4.7.x and I can confirm the same symptoms as prior comments.

After deleting the cookie, the site works again.

A solution could be to either put the expiry time on the cookie to be the same as the preview link or a better verification of the cookie by TYPO3 when it's evaluation it.

This is some advanced ** but hopefully I can look into a patch soon. Anyone else wants to help out?

#7 - 2013-08-09 12:33 - Martin Terber

Got that error in 4.5.29, Chrome 19, but not n Firefox. Same symptoms as above. Removing cookies solved the problem.

#8 - 2013-10-17 21:15 - Christoph Holtermann

I got the same problem today.

Chrome works (30.0.1553.0 (209444), there was no cookie set)

Firefox (24.0) does not.

Typo3 4.7.15

Steps: Installing workspaces extension, followed a preview link some days ago. Afterwards regular browsing of the site without using that link again.

Cookie ADMCMD_prev. Removal led to normal function.

-> Why does a cookie change the behaviour of my browser when I just visit the same site ?

debug log:

```
13-10-17 21:00:45 FATAL Core: Exception handler (WEB) Uncaught TYPO3 Exception: #1294585192: ADMCMD command could not be executed! (No keyword configuration found) | Exception thrown in file

- Project changed from Workspaces & Versioning to Core

- Category changed from Workspaces to Workspaces

#11 - 2014-02-08 14:22 - Andreas Siegel

I just had the same issue with TYPO3 6.1.7 and workspaces 6.1.0.

As in the other cases, removing the cookies solved the problem, but before the entire website was not available for about one day.

#12 - 2014-02-20 17:40 - Alexander Opitz

- Status changed from Needs Feedback to New

- Is Regression set to No

#13 - 2014-05-08 10:39 - Markus Timtner

Still present in 6.2.*

The expected behaviour should be:

if the cookie is not valid anymore,

just show the live site instead!

#14 - 2014-05-13 10:50 - Markus Timtner

This fixes the problem, but I honestly don't know if this could have unwanted sideeffects:

typo3/sysext/version/Classes/Hook/PreviewHook.php

#198ff

```
        } else {  
+         if (isset($_COOKIE['ADMCMMD_prev'])) {  
+             unset($_COOKIE['ADMCMMD_prev']);  
+         }  
-         // throw new \Exception('ADMCMMD command could not be executed! (No keyword configuration found)', 1294585192);  
        }
```

#15 - 2014-05-15 08:38 - Gerrit Code Review

- Status changed from New to Under Review

Patch set 2 for branch **master** of project **Packages/TYPO3.CMS** has been pushed to the review server.

It is available at <https://review.typo3.org/30091>

#16 - 2014-05-15 12:47 - Gerrit Code Review

Patch set 3 for branch **master** of project **Packages/TYPO3.CMS** has been pushed to the review server.

It is available at <https://review.typo3.org/30091>

#17 - 2014-11-06 13:05 - Teamgeist Medien

The above fix solves the problem for me. Thanks.

#18 - 2015-01-23 11:33 - Mathias Schreiber
