Is Regression:			
Sprint Focus:			
Subject:	"Move page after" doesn't work correctly in workspace		
Description			
<p>When trying to move a page (a) after another page (b) that has already been moved in the workspace, the page (a) isn't moved to the correct position in the page tree. Instead, it is moved just after the position where page (b) has been before it was moved itself (ie. the position of (b) in the live workspace).</p> <p>I'm attaching a patch that at least fixes the problem when using drag and drop in the page tree, I'm not really sure if I found all code parts where pages are moved.</p> <p>(issue imported from #M8962)</p>

History

#1 - 2009-02-19 10:17 - Administrator Admin

The patch did not work wenn I tried it with 4.2.4. I got a white screen instead of my website.

#2 - 2011-11-21 03:18 - Stefan Neufeind

- Status changed from Accepted to Needs Feedback
- Target version deleted (0)

I guess this duplicates what 31663 attempts to fix (which is under review currently). If so, please test the patch over there

#3 - 2011-11-21 21:53 - Oliver Hader

- Status changed from Needs Feedback to Resolved
- Target version set to 4.5.8

Handled in issue #31663

#4 - 2013-12-10 01:03 - Michael Stucki

- Category set to Workspaces

#5 - 2013-12-10 01:05 - Michael Stucki

- Project changed from Workspaces & Versioning to Core
- Category changed from Workspaces to Workspaces
