Sprint Focus:	

Subject:	Additional Stylesheets in template.php

Description

When writing a BE modul there is the possibility to add any JS-Files to doc header using

$this->doc->loadJavascriptLib()

Such adding is missing with CSS-files. There are only 3 predefined stylesheets which can be overwritten,

I added an array to add stylesheets, in template they will be inserted after
styleSheetFile and styleSheetFile2. This gives the possibility to add any CSS-files to the header

In the project for Dashboard such adding is needed as any submodule can come along with own stylesheet.
(issue imported from #M9149)
