Subject:	Add the ability of including external files to includeJS/getFileName		
Description	<p>Currently it is not possible to include external JS files using includeJS (since it makes use of t3lib_TStemplate::getFileName).</p> <p>It's possible to include external script via headerData. But headerData isn't a good choice concerning order and duplicate insertion.</p> <p>(issue imported from #M9460)</p>

I'll second that request. Would be nice for including code hosted by Google e.g.

#2 - 2008-12-21 21:51 - Mikkel Ricky

Patch resolving this limitation (is it a bug?) will be uploaded shortly.

The patch renames the original "getFileName" and creates a new "getFileName" that acts as a wrapper for the original one:

```
/** * Wrapper for _getFilename (original "getFileName" renamed) that extends the original functionality in two ways: * 1. external resources can be included by specifying a url (e.g. http://ajax.googleapis.com/ajax/libs/prototype/1.6.0.3/prototype.js) * 2. local resources can include a query part (e.g. fileadmin/lib.js?version=1) * * If the parameter is an absolute url (starting with a protocol specification (e.g. "http://") or a shash ("#")) it will be returned unaltered. * Otherwise, the parameter value will be split into a url and an optional query part (?...), and _getFileName will be called with url as parameter. * If the result of this call is non-empty the query part (if any) will be appended to form the final result. * * @param string Url or Typoscript "resource" data type value. * @return string Url (possibly expanded from Typoscript resource) * @see _getFileName() */
public function getFileName($fileFromSetup) { ... }
```

#3 - 2009-12-18 11:52 - Francois Suter

Actually this is now possible in TYPO3 4.3. Please try and confirm that this bug can be closed. Thanks.

(see the updated TSref for property includeJS and look at sub-property "external")

#4 - 2010-04-30 05:29 - Benjamin Mack

REMINDER #2: This is fixed, please confirm this fix and we'll close the bug.

#5 - 2010-05-06 03:28 - Benjamin Mack

Fixed, and no feedback. So we close this one.

#6 - 2011-03-29 14:18 - Susanne Moog

- Target version deleted (4.4.0)
