TYPO3.Flow - Bug # 1948

Status:	Resolved	**Priority:**	Must have
Author:	Karsten Dambekalns	**Category:**	Security
Created:	2008-11-04	**Assigned To:**	Andreas Förthner
Updated:	2010-10-20	**Due date:**	

PHP Version:	
Has patch:	
Complexity:	
Affected Flow version:	
Subject:	Fatal error when tokens are retrieved from session

Description

As soon as a session is present FLOW3 is unable to start up because of
Fatal error: Call to a member function getPOSTArguments() on a non-object in
.../F3_FLOW3_Security_Authentication_Token_UsernamePassword.php on line 145

This is caused by the token trying to use $this->environment after being fetched from a PHP session in ContextHolderSession. This must be fixed ASAP, e.g. by making sure the inject* methods are called after the context holding the tokens is woken up.

In a later stage this should be using session scope with the component manager (see #1947).

Revision 46a7a094 - 2008-11-04 19:06 - Andreas Förthner

This temporary fixes #1948 until we have a proper session scope. For now it only fixes the problem for UsernamePassword tokens (as this is the only token type we have at the moment)
