Core - Bug # 19496

Status:	Closed	**Priority:**	Must have
Author:	Oliver Hader	**Category:**	
Created:	2008-10-22	**Assigned To:**	Oliver Hader
Updated:	2010-07-02	**Due date:**	
TYPO3 Version:	4.2		
PHP Version:	5.2		
Complexity:			
Is Regression:			
Sprint Focus:			
Subject:	Flexform sections are not working anymore since script.aculo.us is not loaded		

Description

Due to a change of loading JavaScript resources between TYPO3 4.2.1 and 4.2.2 the script.aculo.us JavaScript framework now only gets loaded when it is required (before it was always loaded).

The solution is to explicitly load script.aculo.us when flexform sections are being rendered.

(issue imported from #M9623)

History

#1 - 2008-10-22 22:27 - Peter Niederlag

I'll do this tomorrow

#2 - 2008-10-27 15:01 - Oliver Hader

Please test the attached patch with the provided extension.
To do so, create a new content element of type "Insert plugin" and select "Test Flexform sections" as plugin name. Thanks to Steffen Kamper for writing this test!

#3 - 2008-10-27 15:08 - Oliver Hader

Version 2 of the patch does exactly the same but is IMO easier to read...

#4 - 2008-10-27 17:50 - Steffen Kamper

Thanks olly for the patch, now it's working perfect!

#5 - 2008-10-27 23:59 - Oliver Hader

Hi Peter, a patch for this issue is pending in the Core List. You can give your +1 there if it solves your problem as well.

#6 - 2008-10-28 11:46 - Peter Niederlag

Do 'containers' need scriptaculous as well? I have done a slightly diffrenet patch adding scriptaculous only to 'sections'.

#7 - 2008-10-28 12:18 - Peter Niederlag

0009623_v2.patch and patch-sections-8518.patch both work.

patch-sections-8518.patch will call loadJavascript only once though while 0009623_v2.patch will call it fo ALL child ellements. Do you think this is needed (for 'containers' maybe)?

#8 - 2008-10-28 13:57 - Oliver Hader

Committed to SVN:
- TYPO3_4-2 (rev. 4358)
- Trunk (rev. 4359)
