

Core - Feature # 19551

Status:	Resolved	Priority:	Should have
Author:	Steffen Kamper	Category:	
Created:	2008-10-31	Assigned To:	Oliver Hader
Updated:	2009-11-27	Due date:	
PHP Version:	5.3		
Complexity:			
Sprint Focus:			
Subject:	Feature for automatic load of compressed library		
Description			
<p>The function loadJavascriptLib includes javascript library files if they are not already are included.</p> <p>This patch looks for the compressed version of the lib file and use it when available.</p> <p>This behaviour can be disabled with \$TYPO3_CONF_VARS['BE']['disableCompressedLibs'] = '1'; eg for debugging.</p> <p>the only thing is that a compressed lib has to exist like this: typo3/contrib/prototype/prototype.js typo3/contrib/prototype/prototype.compressed.js</p> <p>call is like before: loadJavascriptLib('contrib/prototype/prototype.js'); (issue imported from #M9714)</p>
