TYPO3 Version:	
PHP Version:	
Complexity:	
Is Regression:	
Sprint Focus:	
Subject:	TYPO3 4.2.3 + IRRE + RTE = System Error when saving.

Description

As stated in the RTE mailing list [1] there is a nasty sounding JS error window popping when saving child records (more than one) that contain an RTE:

Error Message:

"SYSTEM ERROR: One or more Rich Text Editors on the page could not be contacted. This IS an error, although it should not be regular.
You can save the form now by pressing OK, but you will loose the Rich Text Editor content if you do.

Please report the error to your administrator if it persists."

Firebug Debug Output:

data is not defined
setRTEsizeByJS()   htmlarea...ressed.js (line 164)

return null;};var setRTEsizeByJS=functio...ty]=RTE[property]?RTE[property]:false;}}

I cannot reproduce this error after applying the patch attached to issue #9596.

Please upload an extension with which the error may be reproduced.

#2 - 2009-01-05 19:53 - Jochen Rieger

Yes, Stanislas, I can confirm this now after having patched against 4.2.4-dev.

Good work, thanks!

#3 - 2009-01-08 22:12 - Stanislas Rolland

Fixed in SVN TYPO3core branch TYPO3_4-2 (revision 4670).
