

## Core - Bug # 19762

<b>Status:</b>	Closed	<b>Priority:</b>	Should have
<b>Author:</b>	Oliver Hader	<b>Category:</b>	Communication
<b>Created:</b>	2009-01-03	<b>Assigned To:</b>	Oliver Hader
<b>Updated:</b>	2009-12-21	<b>Due date:</b>	
<b>TYPO3 Version:</b>	4.2		
<b>PHP Version:</b>	5.2		
<b>Complexity:</b>			
<b>Is Regression:</b>			
<b>Sprint Focus:</b>			
<b>Subject:</b>	Traversing back page records used in CONTENT object does not work on root page		
<b>Description</b>			
<p>The TypoScript object CONTENT allows to traverse back the rootline until something valid was found with the following:</p> <pre>10 = CONTENT 10 {     table = pages     select.where = media!="     slide = -1 }</pre> <p>This would select any page that has the media field filled.</p> <p>However, this does not work if the record that is expected to be fetched is on the root page and thus has the pid 0.</p> <p>(issue imported from #M10050)</p>

### History

#### #1 - 2009-01-03 23:30 - Oliver Hader

Forgot to mention another flaw:

Using select.pidInList for this approach on the table pages does not make sense at all. Especially and only for pages, uidInList should be used...

#### #2 - 2009-05-05 22:30 - Oliver Hader

Committed to SVN Trunk (rev. 5389)

#### #3 - 2009-10-14 16:00 - Oliver Hader

Reverted this bugfix in SVN Trunk (rev. 6146)
