History

#1 - 2009-01-21 20:47 - Marcus Krause

will be fixed with a #19867 bugfix

#2 - 2009-01-22 17:29 - Sebastian Enders

I am sorry!

The bugfix of 0010205 doesn't help!

I have to switch back to 4.1.7! :-(

#3 - 2009-01-22 17:48 - Michael Stucki

Still it is the same problem, so there is no need to reopen this issue. Please report to #19867 and especially try my latest patch (posted 10 minutes ago) to see if that works better...

#4 - 2009-01-23 11:59 - Benjamin Hoft

We have also problems with the 4.1.8 Version of typo3
There are 3 cookies created with expire date of 2010?

e.g.

Name be_typo_user

Value 5b67a8fff6b747e5ef69a16cca059cca

Path /

Secure No

Expires Sat, 23 Jan 2010 09:52:47 GMT

also fe_typo_user and PHPSESSID

After I login in the BE and browse in the FE and logout in the BE those cookies still there. And if I now close all my browser windows and try to login with a new one those cookies with expire date of 2010 will cause that the login doesn't work.

I wonder why those cookies aren't set to expire on 'At End Of Session' instead of 1 Year later ?

#5 - 2009-01-24 01:41 - Michael Stucki

How come your be_typo_user cookie is valid for 3 years? That can't be normal, please investigate the reason for this first.

#6 - 2009-01-27 11:55 - Benjamin Hoft

I have found out what the troublemaker of my 1 year expire cookies is.

Its the script cookies.js from the efa font size script ...

I wonder how long this was there, but it seems that with the new typo3 version this script causes some major trouble.

btw this script can still be found here:

<http://www.t3net.de/fileadmin/scripts/cookies.js>

also with tutorials

<http://www.t3net.de/dokumentation/extension-tutorials/efa-fontsize-script.html>

I got my from a complete yaml installation

#7 - 2009-01-27 16:24 - Philipp Idler

I think you're right.

I also have yaml installed. I dropped the constant pageHeaderData declared at yaml's constants template and cleared the cache/cookies.
After doing that, the cookie's lifetime was set to "at the end of the session".

#8 - 2009-01-30 23:26 - Helmut Hummel

Yeah, just found out the same after doing some testing.

I fixed the cookie.js for us by not letting it touch ?e_typo_user and PHPSESSID "cookies".

I attached the fixed cookies.js here and close this report, since TYPO3 behaves perfectly right in this case.

#9 - 2009-01-30 23:29 - Helmut Hummel

I'm glad TYPO3 behave perfectly right and does not accept the faulty cookies,

#10 - 2009-02-03 21:24 - Helmut Hummel

Uploaded wrong file

#11 - 2009-02-03 21:28 - Helmut Hummel

Sorry for uploading the wrong file. Now I changed it with a version Albert van der Veen suggested. It only changes the efaSize cookie and leaves all others alone...

#12 - 2009-02-03 21:58 - Helmut Hummel

Leave it as resolved for the time beeing
