Is Regression:	
Sprint Focus:	
Subject:	CONTENT can't select records from rootpage

Description

If you use the "CONTENT" TypoScript object, to retrieve records from the root-page - like "static_countries", etc. This is currently not possible.

There was already a fix by Oliver Hader making this partly possible. But there is still a restriction to table "pages".

Solution: Remove the restriction of the pid value to 0 for pages. Allow pid=0 for any table.
See attached patch
